### MUSICAL SHOW IN LOURDES From April to October 2022.

*«Bernadette of Lourdes» is the tale of the* fascinating and inspirational visions of the Virgin Mary seen by Bernadette Soubirous. www.bernadettedelourdes.fr/en

Every year millions of visitors flock from all over the world to this small town where a little girl called Bernadette saw the Virgin Mary in a grotto near the river in 1858.

Go on a mystical adventure? Even better. Experience a one-of-a-kind place that you must see at least once in your lifetime.

GRANDS SITES Occitanie SUD DE FRANCE

What strikes you as soon as you reach St Michael's **gate** is the sheer size of the site. The bell tower's spire topped by a crucifix appears on the horizon. Two basilicas are the focal point. The third lies beneath our feet. A beautiful floral 400m esplanade gives us a wonderful insight into what's to come.

The esplanade opens onto a large round forecourt: the Rosary Basilica amidst the trees.

A statue of the Virgin Mary facing the basilicas stands at the meeting point between the esplanade and forecourt. This is where pilgrims traditionally meet: "the Crowned Virgin".

spire: the Immaculate Conception. One below topped by a golden dome: the **Rosary Basilica**. The front of the Rosary Basilica is covered in mosaics depicting the five "glorious mysteries" suggested by Pope John Paul When visitors leave the Grotto, they see the great Il who twice made the pilgrimage to Lourdes.

A system of ramps leads from the forecourt to the upper basilica via the golden dome. The ramps leading to the mother church, the Basilica of the Immaculate Conception, represent the Virgin Mary's loving arms.

Pilgrims have a choice of 3 directions from the forecourt. Either they go to the Rosary Basilica, walk up the ramps to the Immaculate Conception or go to the Grotto.

Pilgrims can walk between the forecourt and Grotto through seven tall and wide arcades beneath the ramps and inspired by the Bernini's columns on St-Peter's Square in Rome.

After walking through the arcades, visitors drink from the fountains and head towards the Grotto. They naturally form a procession along the rock beneath the Basilica. Everyone radiates faith and Two churches appear before her. One topped by a humanity. The group unite in silence. They are not just here to see **the Grotto**; they are here to touch, stroke and kiss the rock in a show of religious, pagan, superstitious and magical belief.

> pyramid of candles that burns day and night. You're welcome to keep the flame alive that's burned for so long.

### A SITE THAT'S OPEN FROM 6H AM TO MIDNIGHT

Everyone can walk the length and breadth of the site, visit all the buildings, spend as long as they like and go where they want. There's no set itinerary. The Grotto is even open at night.

### A NATURAL HAVEN ON THE EDGE OF TOWN

Visitors to the Sanctuary can hear the Gave River running from the mountains through Lourdes; they can see cliffs, trees, hills and meadows and feel the wind blow. Most of the trip is spent in the great outdoors in a leafy and natural setting. The safe and comforting town lies outside the Sanctuary with all its services, events and facilities.

It's the highlight of the day in Lourdes! Each evening thousands of visitors and pilgrims meet to walk in procession behind a statue of Our Lady of Lourdes, each holding a flaming torch, the procession is from the Grotto des Apparritions to the esplanade of the Notre Dame basilica. The crowd can be immense, it is a spontaneous and joyous occasion, full of energy.

The torchlight parade, nightfall, songs, banners and pennons take to the Rosary forecourt as candles on the ramps form a crown of light: it's a sight for sore eyes.

Every day from April to October at 9 pm (duration 90 minutes), one can acquire torches inside the Sanctuary area.

What makes Lourdes so unique and appealing as a spiritual experience is that it isn't just about Christian rituals. Whether it be stroking the Grotto rock, burning a candle, joining a torchlight procession, drinking water from the fountains or bathing in the pools, everyone, no matter the depth of their faith, can get involved in these meaningful and grace-giving activities and give them their own meaning. Visitors will never be asked to prove their faith as long as they behave with respect.

LOURDES

Lourdes brings together people from all over the world with

different languages, cultures, appearances and religious

practices. Visitors are surrounded by songs and prayers

in every language and feel as though a united mankind

Lourdes reaches beyond words to the senses. Touching the

rock, drinking the water, lighting the candle and carrying

the torch are just some of the actions that bring to mind

nature's vital elements: water, earth, fire and air. Everyone

shares in these elements no matter their culture.

could be possible.

The Pic du Jer towers over Lourdes and its large crucifix (lit up at night) makes it instantly recognisable. A 100 year old funicular takes visitors up 1000m in a matter of minutes; it's a trip to remember. A footpath leads to the observatory where a unique vista has 360° views of Lourdes, Tarbes, Pau, Argelès-Gazost Valley and the Pyrenean peaks.

# THE FORTRESS AND PYRENEAN MUSEUM

5 3

The fortress listed as a Monument Historique is built on a rocky outcrop overlooking the town where Mary appeared. It's a strategic site with all-encompassing views. The medieval fortress is now home to the Pyrenean Museum. We recommend tackling the fortress and marching up the 104 narrow steps to the top of the dungeon for incredible 360° views. Not to be missed: the great legend of Charlemagne behind the Lourdes coat of arms.

# LOURDES BEACH

The town where Mary appeared turns into a lakeside resort. There's so much for sports lovers to enjoy: 3 mountain bike trails (green, red and black), 18-hole golf course, lakeside fishing and hiking. There's an easy 6km footpath around the lake with just a 50m elevation. It's also a great spot for lunch on the restaurant terrace by the lake.

### THE PLANETARIUM : AN IMMERSIVE CINEMA AT THE PEAK

Housed within the hundred-year-old cupola of Baillaud, a hemispherical screen 8 metres in diameter covers the entire dome, and 45 comfortable inclined seats await spectators for an XXL cinema showing. The film unfolds the secrets of the universe and the incredible tale of the Pic du Midi, from its construction to the present day. A spectacular show!

### LE 2 877: ONE OF THE HIGHEST RESTAURANTS IN THE WORLD

The restaurants that can promise their guests a table at almost 3000 meters' altitude are few and far between. "Le 2877", the new restaurant at the Pic du Midi with a capacity of 70, is one of them. The restaurant's staff pull off miracles every day to propose an original menu and set menus exclusively made from premium quality products. A breathtaking panorama, a cosy atmosphere and a delicious meal make this culinary hotspot an essential location in the Pic du Midi.

### HISTOPAD: THE STORY OF THE PIC IN AUGMENTED REALITY

When visitors arrive at the summit of the Pic, they can pick up a digital tablet called a Histopad free of charge. This pad will let them experience an incredible immersive voyage in augmented reality as they follow in the footsteps of the first scientists at the observatory. The Histopad is available in six languages: French, English, Spanish, German, Italian and Japanese. THE SKY BRIDGE: IMMERSE YOURSELF IN THE SKY

This bridge in the sky, which opened in 2018, offers visitors an incredible visual and emotional experience as they make their way in complete safety along the 12 m walkway. From its glass floor at its highest point, the view it offers is unique and will make your head spin. Definitely fodder for the photo album.

### THE EXPERIENCE ZONE : SCIENCE ACCESSIBLE FOR EVERYONE

Since 2018, this new section offers interesting and fun experiments that illustrate the major topics of the work and research carried out at the Pic du Midi: the sun, cosmic rays, the stars, the atmosphere and meteorites.

The "scientific" zone, with its hushed nocturnal ambiance, takes visitors on a tour punctuated by interactive screens and projections of books. Optical illusions are there to trick your eyes. It is a visit full of surprises. The International Dark Sky Reserve, in the "immersive" area, also really comes into its own. Travellers will experience a new dimension of space and become one with it. Their perceptions will change. Poetic reality beats virtual reality any day. The final room highlights the rich architectural and natural heritage of the Pic du Midi.

### THE PUREST SKY IN EUROPE

In 2013, the Pic du Midi was labelled an "International Dark Sky Reserve" (IDSR). It is the only such Reserve in France, the 1st in Europe and also the largest in the world. The central area of the Reserve now covers 612 km2. This label recognises the incredible quality of the night sky, due to an air purity and an atmospheric stability that are among the most spectacular in the world. This is a major additional draw for the Pic du Midi, with clientèles becoming more and more concerned about environmental issues.

# GAVARNIE

HERITAGE SITE BY UNESCO GAVARNIE IS THE MOST -AMOUS NATURAL ARENA THE WORLD, IT IS VISITED BY OVER A MILLION VISITORS EACH YEAR.

CLASSED AS A WORLD

GRANDS SITES Occitanie SUD DE FRANCE

*The site has very easy access. The view from Gavarnie village towards the cirque is fabulous,* an easy path (2 hours return) leaves from the village towards the foot of the cirque.

Nothing can prepare you for your first glimpse of the Cirque de Gavarnie. The wordsmith Victor Hugo described it as "the most mysterious building by the most mysterious architects; it's the colosseum of nature: it's Gavarnie". An impressive natural amphitheatre of rare perfection.

Gavarnie looks like pure invention nestled in the middle of the Pyrenees. It's over 5km in diameter with 1500m high vertical walls, hundreds of waterfalls and a crown of peaks exceeding 3000m in altitude.

Gavarnie may be the most spectacular and famous natural cirgue but it's not alone. Troumouse and Estaubé are a stone's throw away and a feast for the eyes.

The staggering cirques lie next to the Spanish canyons in Spain's upper Aragon and together form the Gavarnie-Mont-Perdu site, a sacred mountain listed as a UNESCO World Heritage site and unique slice of the Pyrenees.

# CAUTERETS-PONT D'ESPAGNE

# IN THE VERY HEART OF THE NATIONAL PARK

Bubbling streams, foaming waterfalls, glittering lakes, summer meadows covered in wildflowers, leafy forests, marmots basking in the sunshine, the elegant silhouette of a female izard sitting on a rock next to her kid, blue tits chirping, ibex bickering, a wood grouse perched in a tree...it's like something from the Garden of Eden. Welcome to Cauterets-Pont d'Espagne, the Pyrenees' secret garden watched over by Lord Vignemale, the range's highest peak. Fill your lungs with clean air imbued with the scent of sap and wild thyme. Soak up the peace and quiet.

Prestigious and beautiful natural site. It is protected in the heart of the Pyrenees National Park. Flora and fauna have made it their home and you can approach the calm izards and marmots.

You don't need to be a keen hiker as the facilities, cable cars and ski lifts make the trip a walk in the park. It is one of the most visited sites in the Pyrenees National Park.

### THE PYRENEES NATIONAL PARK: ONE-OF-A-KIND NATURAL WEALTH IN EUROPE

The National Park was created in 1967, it follows the frontier ridge for over 100 kms. Twenty mountain refuges provide accommodation for visitors. The Park has a wealth of rare plants and animals including the famous Pyrenean Ramonda, the vibrant yellow Turk's Cap Lily, the Blue Thistle...there is a fabulous range of alpine plants to be admired, in the meadows, the woodland, on the rocky ridges. Other residents of the Park, many of whom are becoming increasingly rare in France, include Lammergeyers, Golden Eagles, Eagle Owls, Egyptian Vultures, Capercaillies... The rarest is possibly the Desman, a semi-aquatic mammal which lives in the pure waters of the mountain streams. Only two species exist, the other one is in the Urals! More easily spotted are the many marmots and Isards.

### Of the 9 National Parks in France the Pyrenees National Park is the most visited.

There are more than 350 kms of waymarked trails in the Park offering many possibilities: itinerant tours staying in mountain refuges, day walks, guided walks, outings with National Park specialists.

### Néouvielle National Nature Reserve, An archipelago in the heart of the pyrenees

The Néouvielle Reserve is undoubtedly one of the best sites in the Pyrenees and has been protected since 1936, well before the foundation of the Pyrenees National Park. The scenery is breathtaking. Sharp granite peaks contrast with rolling countryside dotted with pine trees and 70 lakes bursting with greens, blues and turquoises. The reserve is south-facing meaning it gets good Mediterranean climate conditions that encourage more plants to grow at altitude here than elsewhere. You can even see mountain pines at 2600m! They are the highest in Europe. Another unique resident: the Pyrenean salamander, a large newt from the time of the dinosaurs. Other residents in this stunning garden include lone foxes, izards, marmots, griffon vultures, bearded vultures, frogs and midwife toads.

# THE NEOUVIELLE TOUR

The footpath runs from shelter to shelter, valley to valley along the mountain passes to conquer the Néouvielle Tour. A total of 5 guarded shelters enable walkers to explore the Reserve on an exciting hike at their leisure for several days.

On the other side of the canyon lies the magnificent Cirque de Gavarnie. One mountain with two distinct slopes, "Gavarnie-Mont-Perdu" has been designated as a UNESCO World Heritage Site.

The unspoiled Pyrenees have been spared the urbanisation and industrialisation that other mountain ranges have experienced. They now provide hi-tech skiing (slow boarding chair lifts, ski lifts, modern snow making equipment etc.) in an untamed setting and wide open spaces. You can even ski in havens such as the Pyrenees National Park or UNESCO World Heritage Gavarnie-Mont Perdu site. Serious skiers can take a funicular up the Pic du Midi for a high mountain site devoted exclusively to freeriding. This is no skiing factory; these are friendly resorts oozing personality and local tradition. People chill out after skiing in the warm waters of the 8 thermal baths in charming little mountain villages before tucking into tasty local dishes.

Off the slopes there are lots of winter sports such as snowshoeing, Nordic skiing, dog sledding, sledding, cross-country skiing and ice skating.

to build to the their start

Every year the Hautes-Pyrénées pursue a policy of heavy investments to provide the ski stations with next generation equipment and offer the skiers even more comfort and services: detachable ski lifts, gondola lifts, ultra-modern artificial snow machines...

Immaculate slopes, perfectly prepared runs and efficient ski lifts which appeal to more and more skiers and holiday makers each year.

# NUMBER 1 SKI AND SPA DESTINATION IN FRANCE

In the winter, the mountain's customers wish to re-energise, treat themselves, and rediscover peace of body and mind. The Pyrenees are an ideal mountain range to restore the balance unsettled by everyday life. Pure air, preserved nature, healthy food, altitude and regenerative hot thermal water are some of the natural gifts offered by the Pyrenees to allow everyone to rediscover, in the course of their holidays, a radiant complexion and tranquillity. After a day spent outdoors on the ski slopes, in a pure environment, the hot water, full of minerals coming from the mountains, offers revitalisation and comfort.

### 8 SKI STATIONS / 8 SPA CENTRES

In the Hautes-Pyrenees, all the ski stations offer for "après-ski" a relaxation in thermal spring water in the innovative and modern balneotherapy centres. They offer clients relaxation spaces with a thermal hot water lagoon, bubbling massage beds, geysers, swan-neck jets, musical baths, jacuzzi, sauna, Turkish bath... For a complete relaxation, each centre has developed its own specific range of treatments. Massages and well-being therapy, donkey milk baths, Dead Sea treatments, introductions to the art of Turkish baths or Japanese rituals...

# OF THE "SOUTH WEST" OF FRANCE

Linking the Atlantic and the Mediterranean, the Pyrenees are the mountain range of the South of France, no fuss, calm and relaxed. The sun is not only in the sky but also in the hearts of the inhabitants. Visitors are welcomed as friends. A great spread is laid out, anecdotes and tips are readily shared and service is rendered with simplicity.

### Human-scale stations

Here there are no concrete slopes built to welcome tourists but friendly stations marked with the local identity, and small welcoming villages full of charm and life, which have retained their parochial attitude, their character and their traditions and which are inhabited all year round. The Pyrenees have been able to combine the development of modern and innovative facilities with the preservation of their identity and a natural and architectural heritage.

### A destination full of heart

In the Pyrenees we take our time, we talk over a coffee or a mulled wine, we eat with the children, we lounge on sunny terraces, we appreciate a deckchair facing an impressive view. Late in the day, the villages are teeming. Entertainment, bars, restaurants, shopping...

DAY 7 : Louron Valley's Roman chapels & Balnéa & Night in Lourdes. The low-key Louron Valley next to Saint-Lary has an unusual
